250 points. Round robin mode. In case of equal match points, play-offs took place.
Endranking without play-off.

Tournament average (without play-off): 3,122 (19986 / 6401)

Play-off

| | | MP | Pts. | In | AV |
|----------------------|----|----|------|----|-------|
| Manuel Horacio Gomez | AR | 1 | 250 | 88 | 2,840 |
| Anselmo Berrondo | UY | 0 | 235 | 88 | 2,670 |

In contrast to the carom disciplines, the average for 5-pins is calculated as follows: points scored divided by the opponent's points. Accordingly, no tournament average can be calculated. There are also no two match points for a win, only one - draws are not possible, as matches are always played without equal innings.

Only at the first World Championships in 1965 and 1968 was a different type of scoring used, namely analogous to carom (points scored divided by innings).

In order to be able to compare world championships over the years, a final tableau with the averages is listed under "details" according to the later usual presentation.
