250 points. Round robin mode.

Tournament average: 3,538 (20171 / 5986)

In contrast to the carom disciplines, the average for 5-pins is calculated as follows: points scored divided by the opponent's points. Accordingly, no tournament average can be calculated. There are also no two match points for a win, only one - draws are not possible, as matches are always played without equal innings.

Only at the first World Championships in 1965 and 1968 was a different type of scoring used, namely analogous to carom (points scored divided by innings).

In order to be able to compare world championships over the years, a final tableau with the averages is listed under "details" according to the later usual presentation.
