

The World Championships Biathlon

World Championships in the biathlon discipline were held between 1987 and 1996.

A total of five tournaments were held, in which Marco Zanetti (IT) was successful twice. The three other world champions from Sweden, Denmark and Belgium each won one title.

It remains to be seen to what extent there will be individual world championships in this discipline again in the future. There has already been an “International Biathlon Teams Cup” as a team competition at international level in 2023. The CEB also organizes European Biathlon Team Championships for national teams, both in the general and youth categories.
